

## The Faculty of Electrical Engineering

**In anno 2021, the Faculty of Electrical Engineering has turned 100 years old.** Several major departments, including Electromechanics, came into existence in 1921, when the former *National School of Civil Engineering* (established in 1864) grew into the Polytechnic School of Bucharest, as consecrated by the royal edict endorsed by Ferdinand, King of Romania (June 10, 1921).

Today, the *Faculty of Electrical Engineering* provides higher education curricula (at undergraduate and graduate levels) and conducts research in theoretical and applied electromagnetism in areas of low frequency, low and medium voltage, medium and high-intensity currents, including electromagnetic fields and electrical circuits, energy conversion and sources, metrology, measurement systems, electrical machines and apparatus, power electronics, electrical drives and motion control, bioengineering, electro-technology, (E)CAD in electrical engineering, management, electromagnetic compatibility, *etc.*

The Faculty of Electrical Engineering is the founder of the National Consortium of Electrical Engineering Faculties, the nationwide academic network of the seventeen faculties of electrical engineering.

## CALL FOR PAPERS
